HERO GENERATION

EXTREME MEASURES

After an asteroid attempts to destroy Lagos city (*see guardian prime #3), our heroes THE EXTREMES come out of hiding to save the city. Buildings have been set ablaze and lives are endangered. Can these underground heroes save everybody? Find out in their debut issue, guest starring the strongest man in the universe; GUARDIAN PRIME!...

I've watched moments like this before on t.v, only when the firefighter gets to rescue the victim, God intervene's and he makes his way out... big hero.

In reality the difference is very big. In this country it's bigger.

CRIEEEK!!

waaahhhh!!!

And dear God, since I entered this building I've been praying for your intervention, but my chances just seem gloomier...

No no, I can't start thinking like that, this child's tomorrow is counting on me, on my faith. But the heat... my God, the building is falling in!

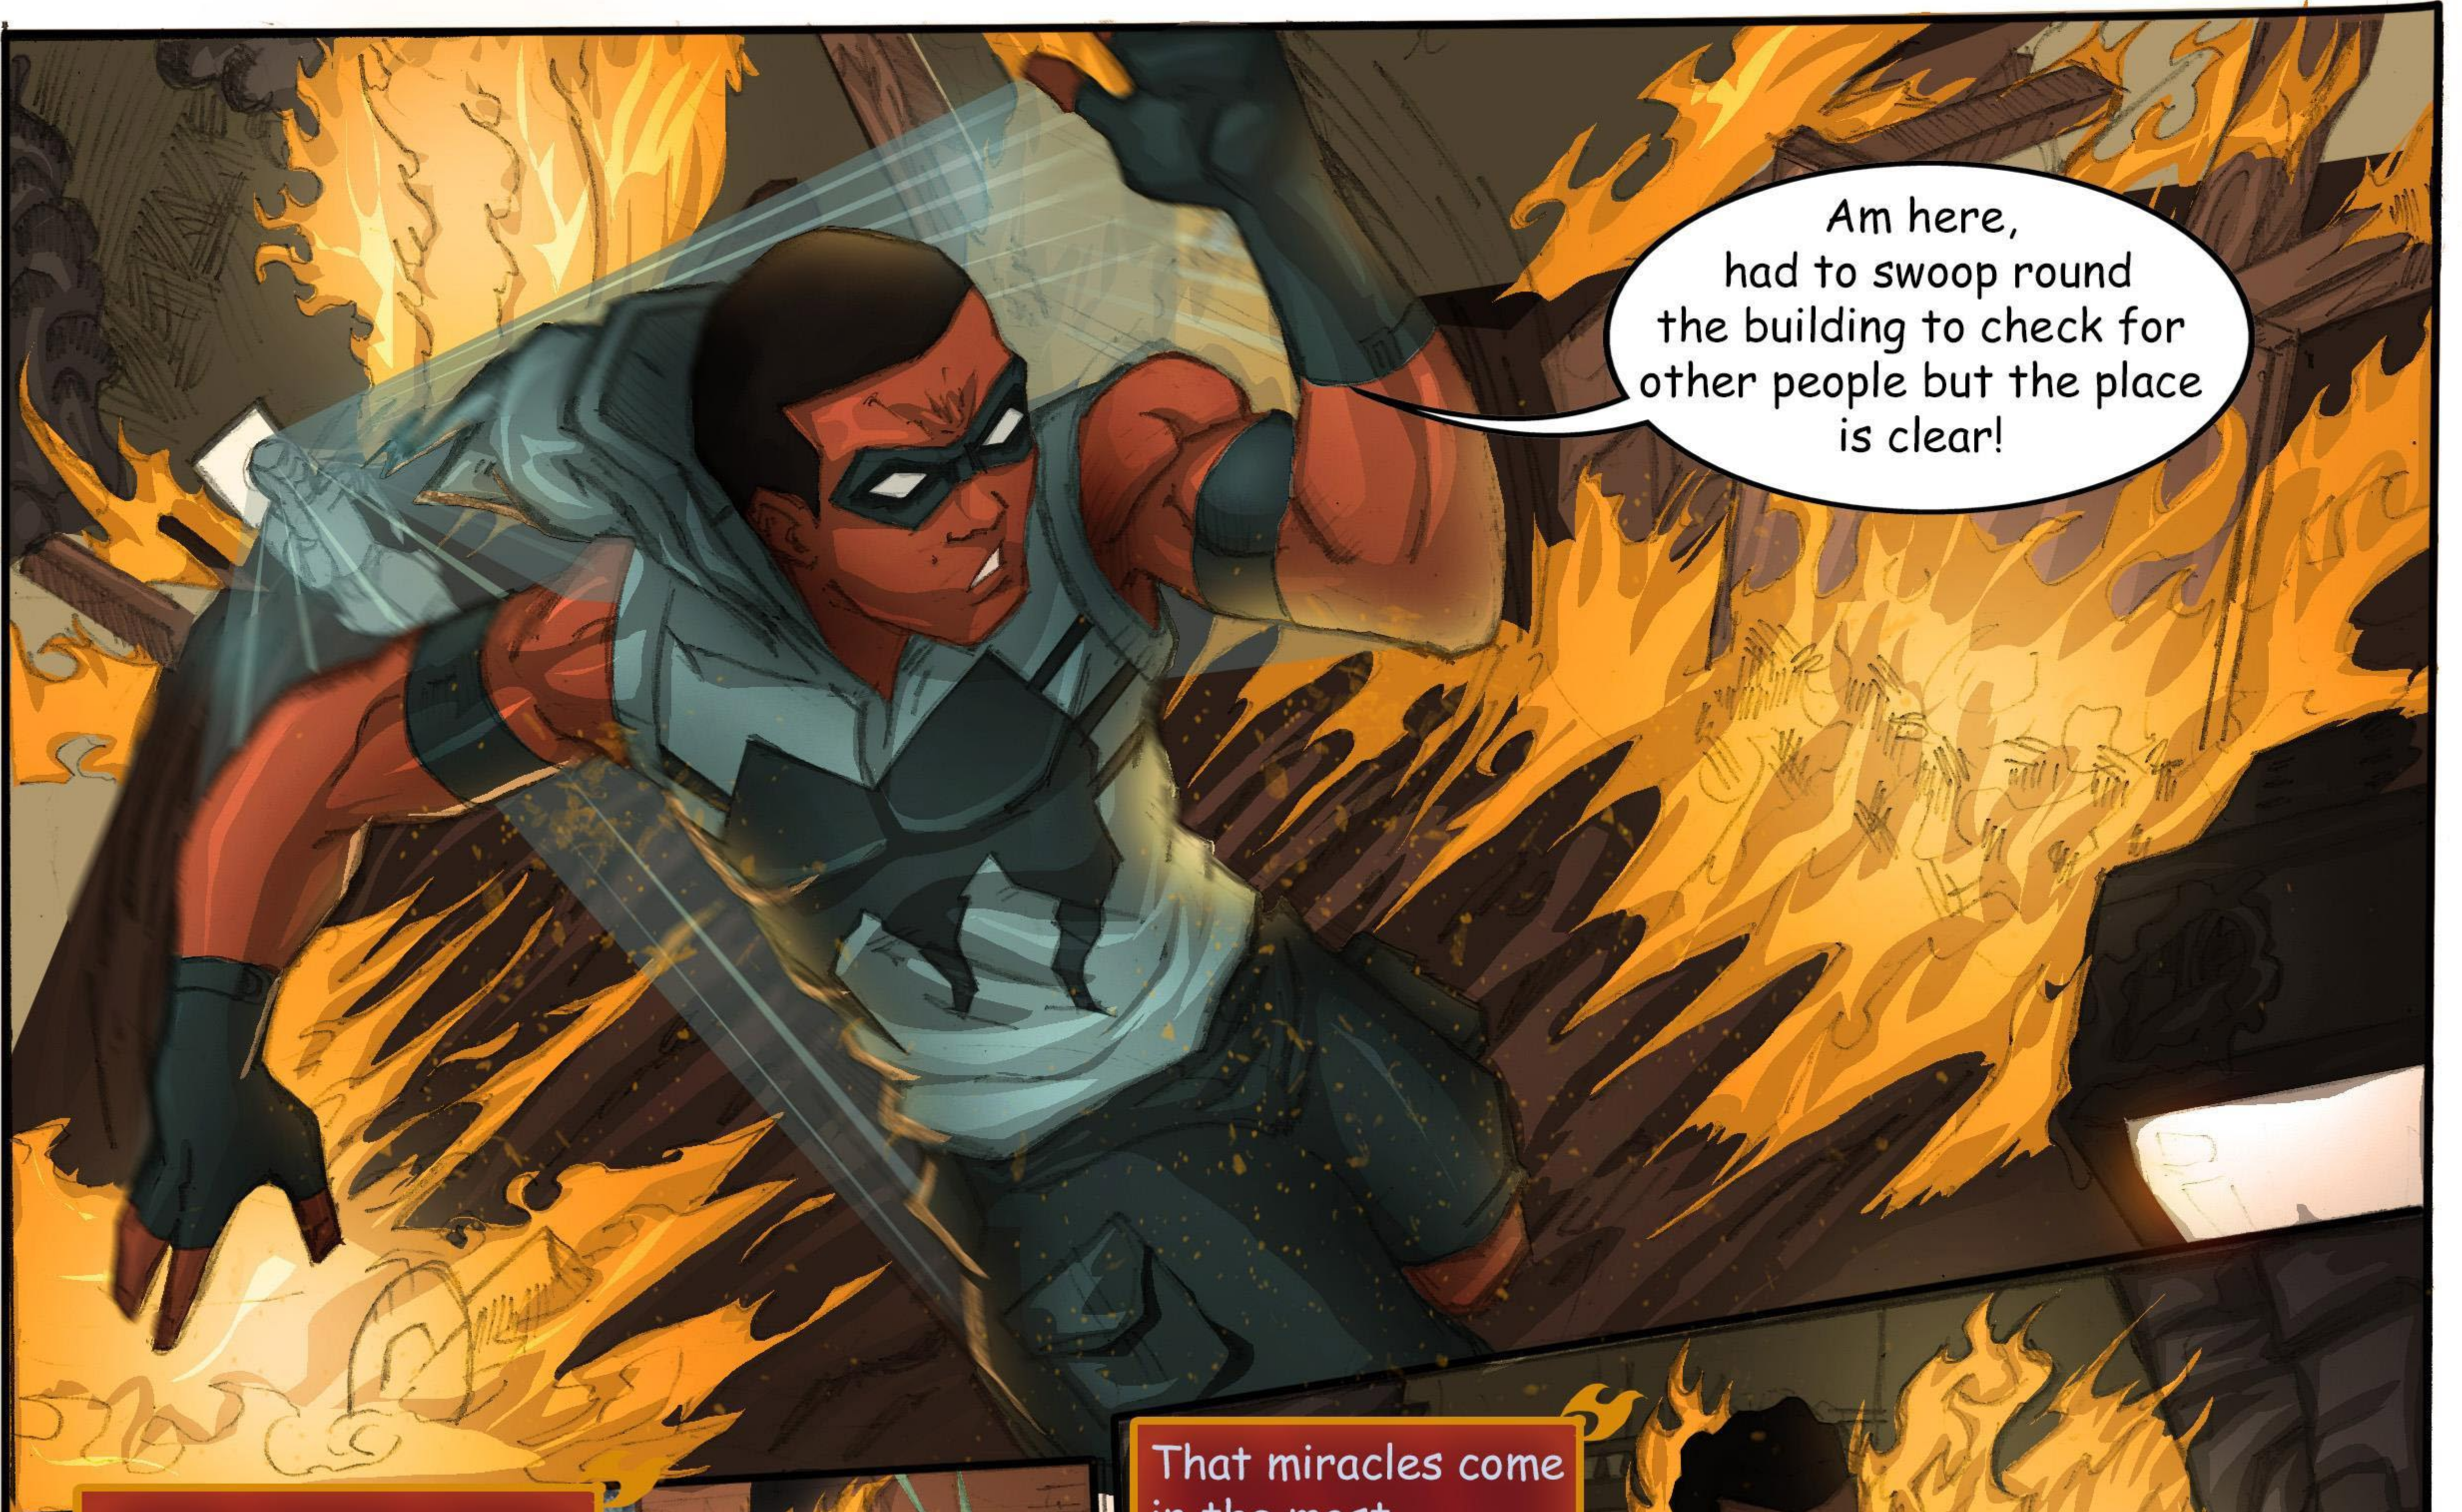

It's okay little one, God is with us, close your eyes---

Oh lord!

Don't worry I got you. Are you okay?

MAXSP---

Am here, had to swoop round the building to check for other people but the place is clear!

Do I see it as luck or do I see it as a sign that God still listens

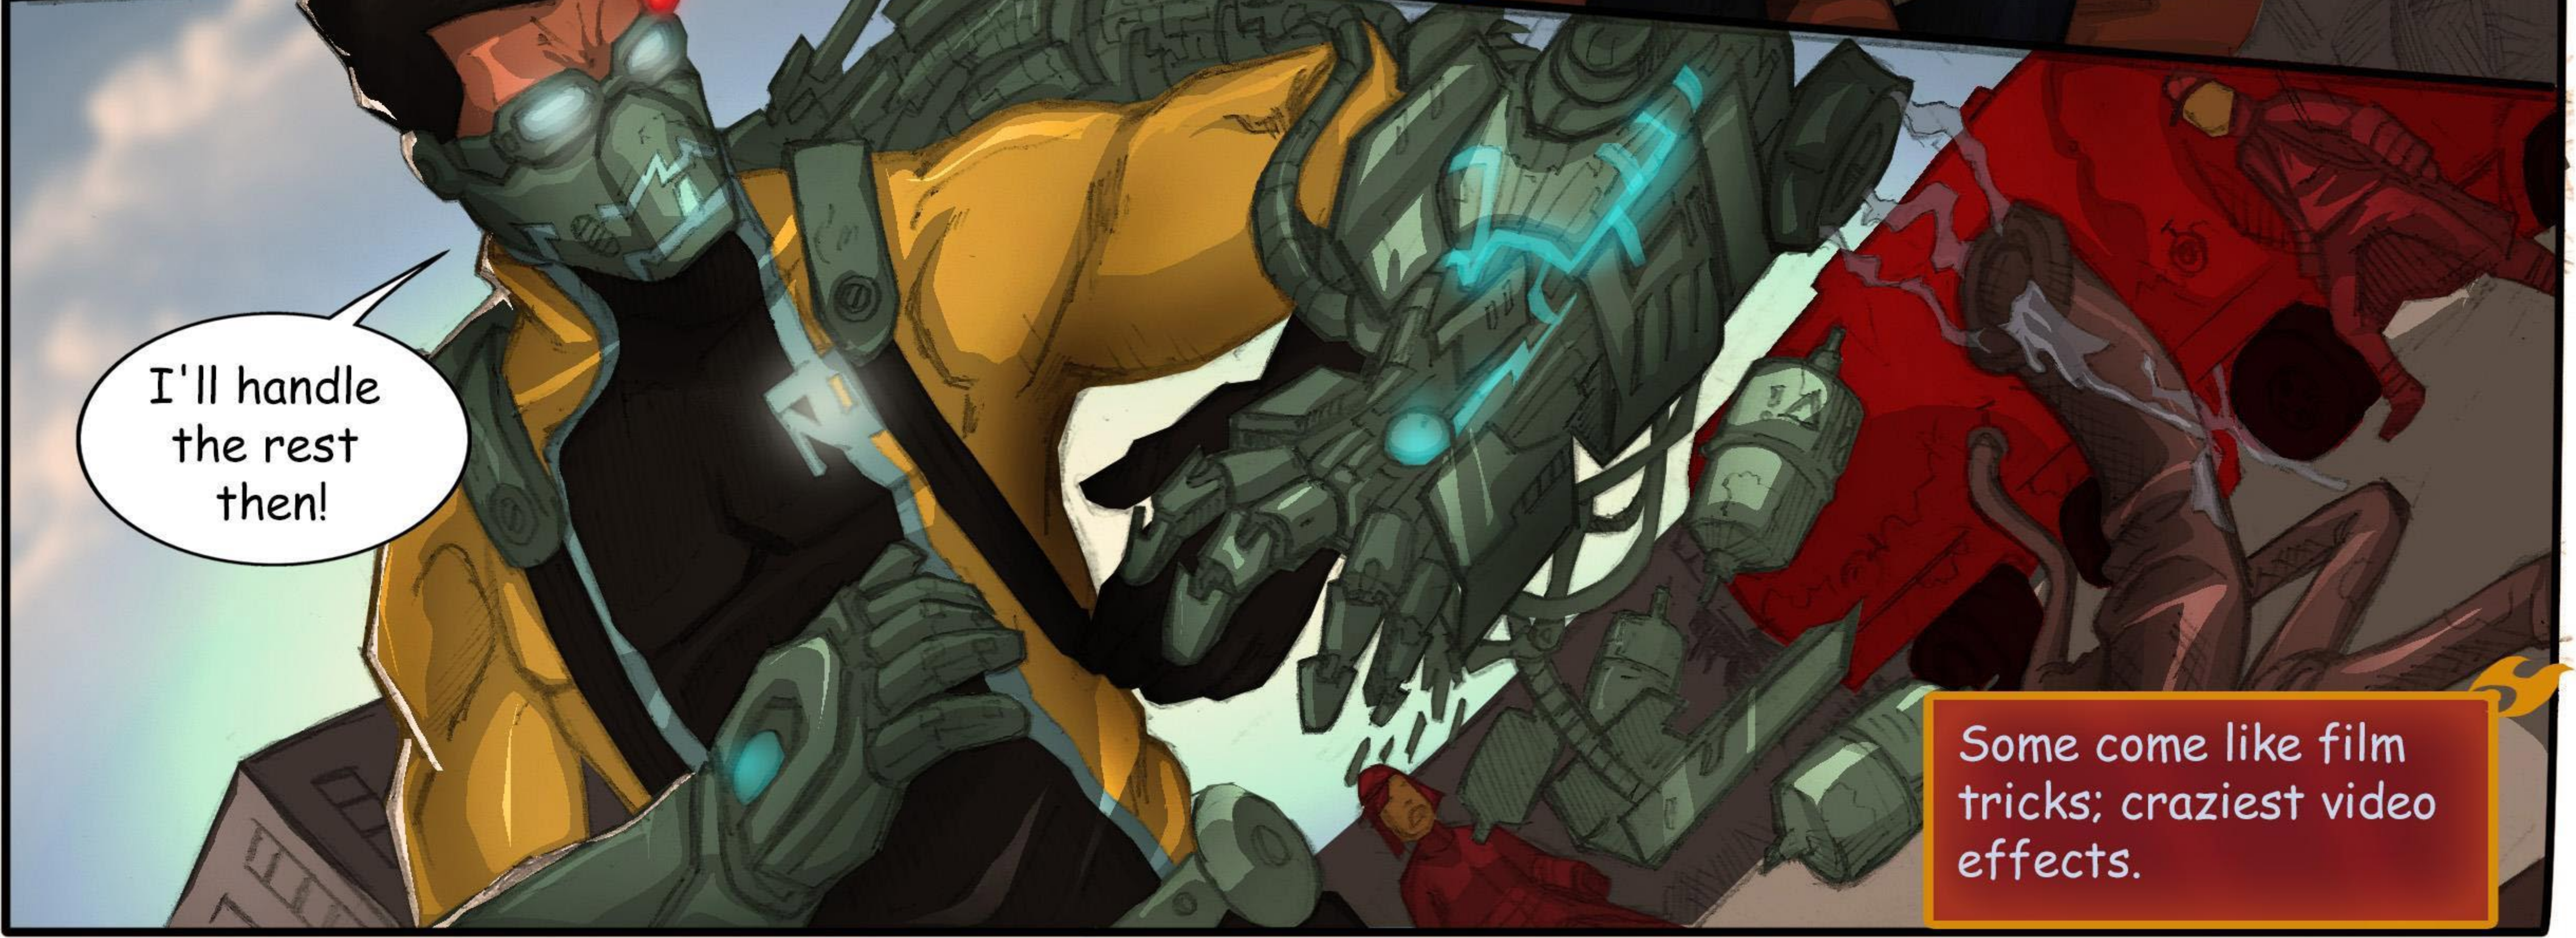

That miracles come in the most unexpected forms.

Checked everywhere, there is no one left.

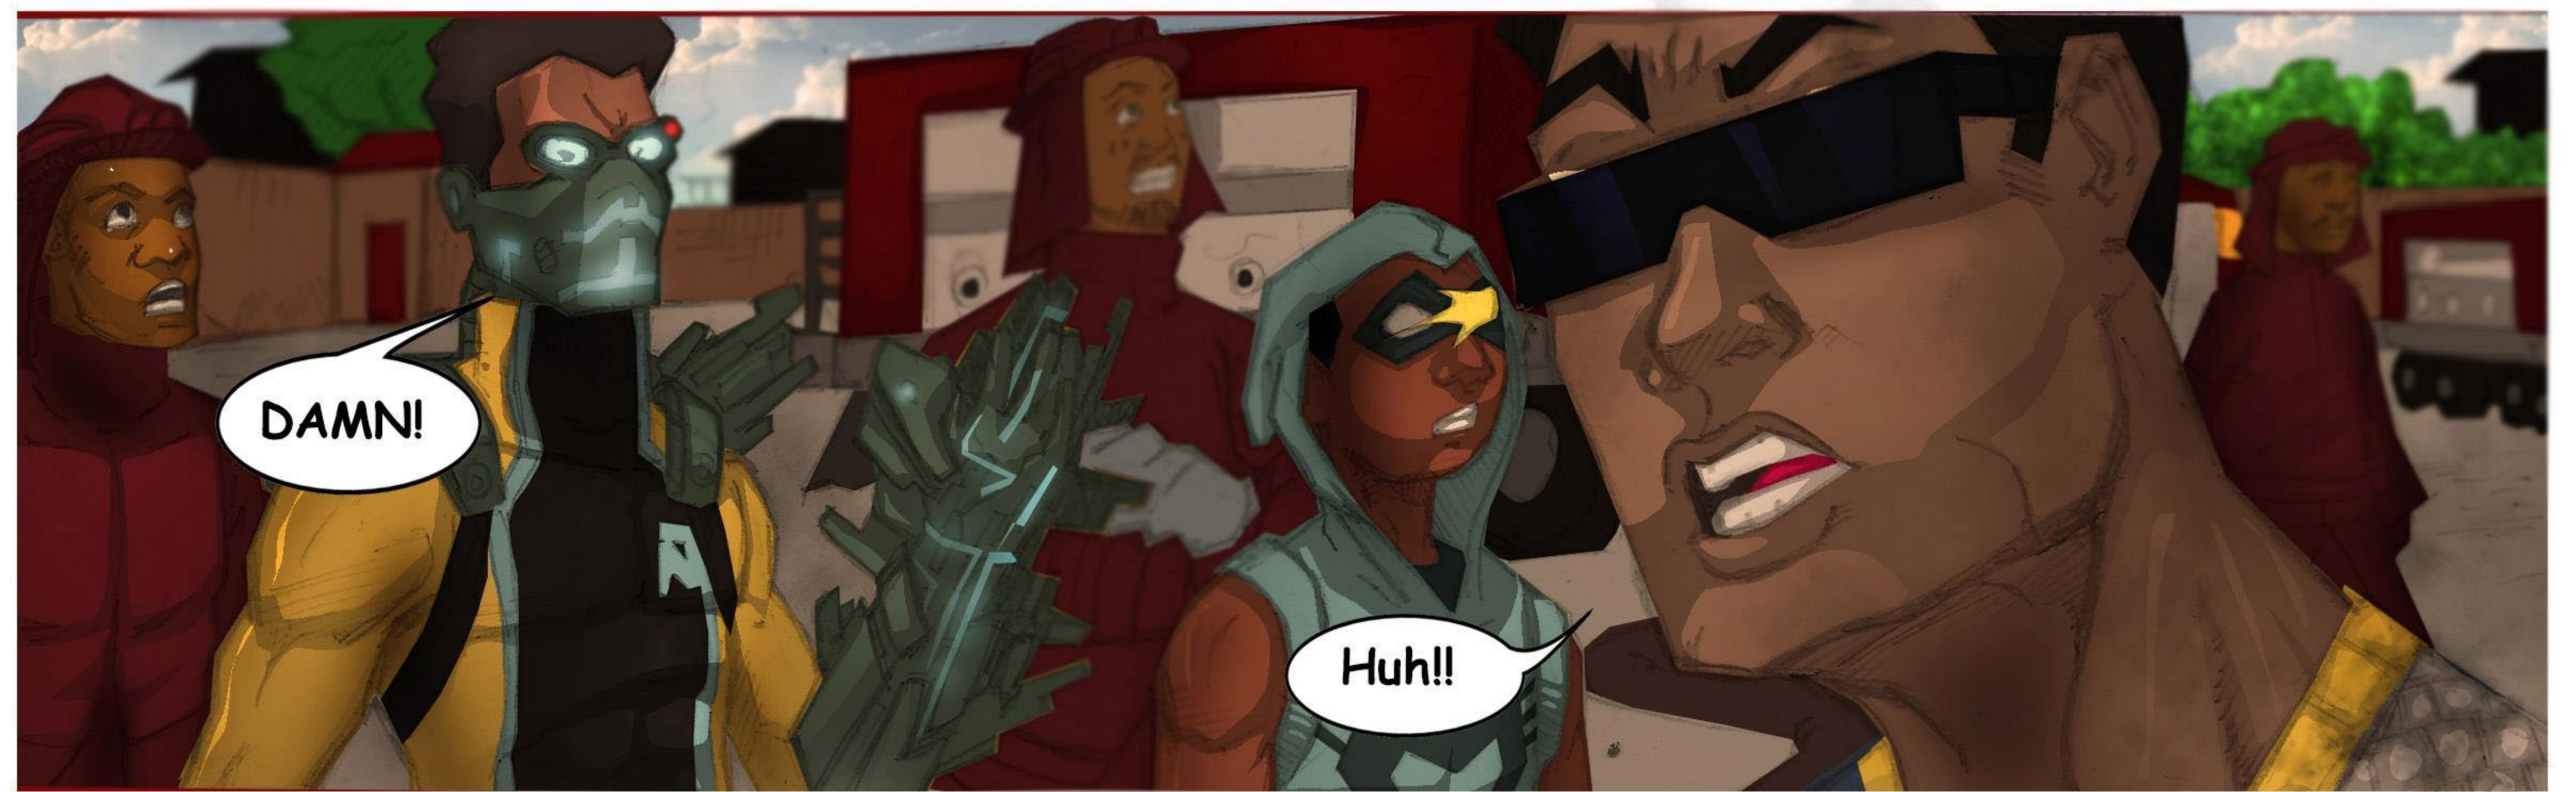

I'll handle the rest then!

Some come like film tricks; craziest video effects.

In my line of work after putting out fires and saving people, they'll say good job, you're the best at what you do, you're a hero.

How can I be so blind!

The intense heat from entering the earths atmosphere would have weakened the thinner parts of the asteroid, especially along the edges!

DONT FORGET TO LIKE US !!

The debris from the asteroid exit, my sensors indicate 80% metal components in the fragments held together by ice and dust. I can break it apart with my magnetic ability, but that large piece is the problem, can't handle that much!

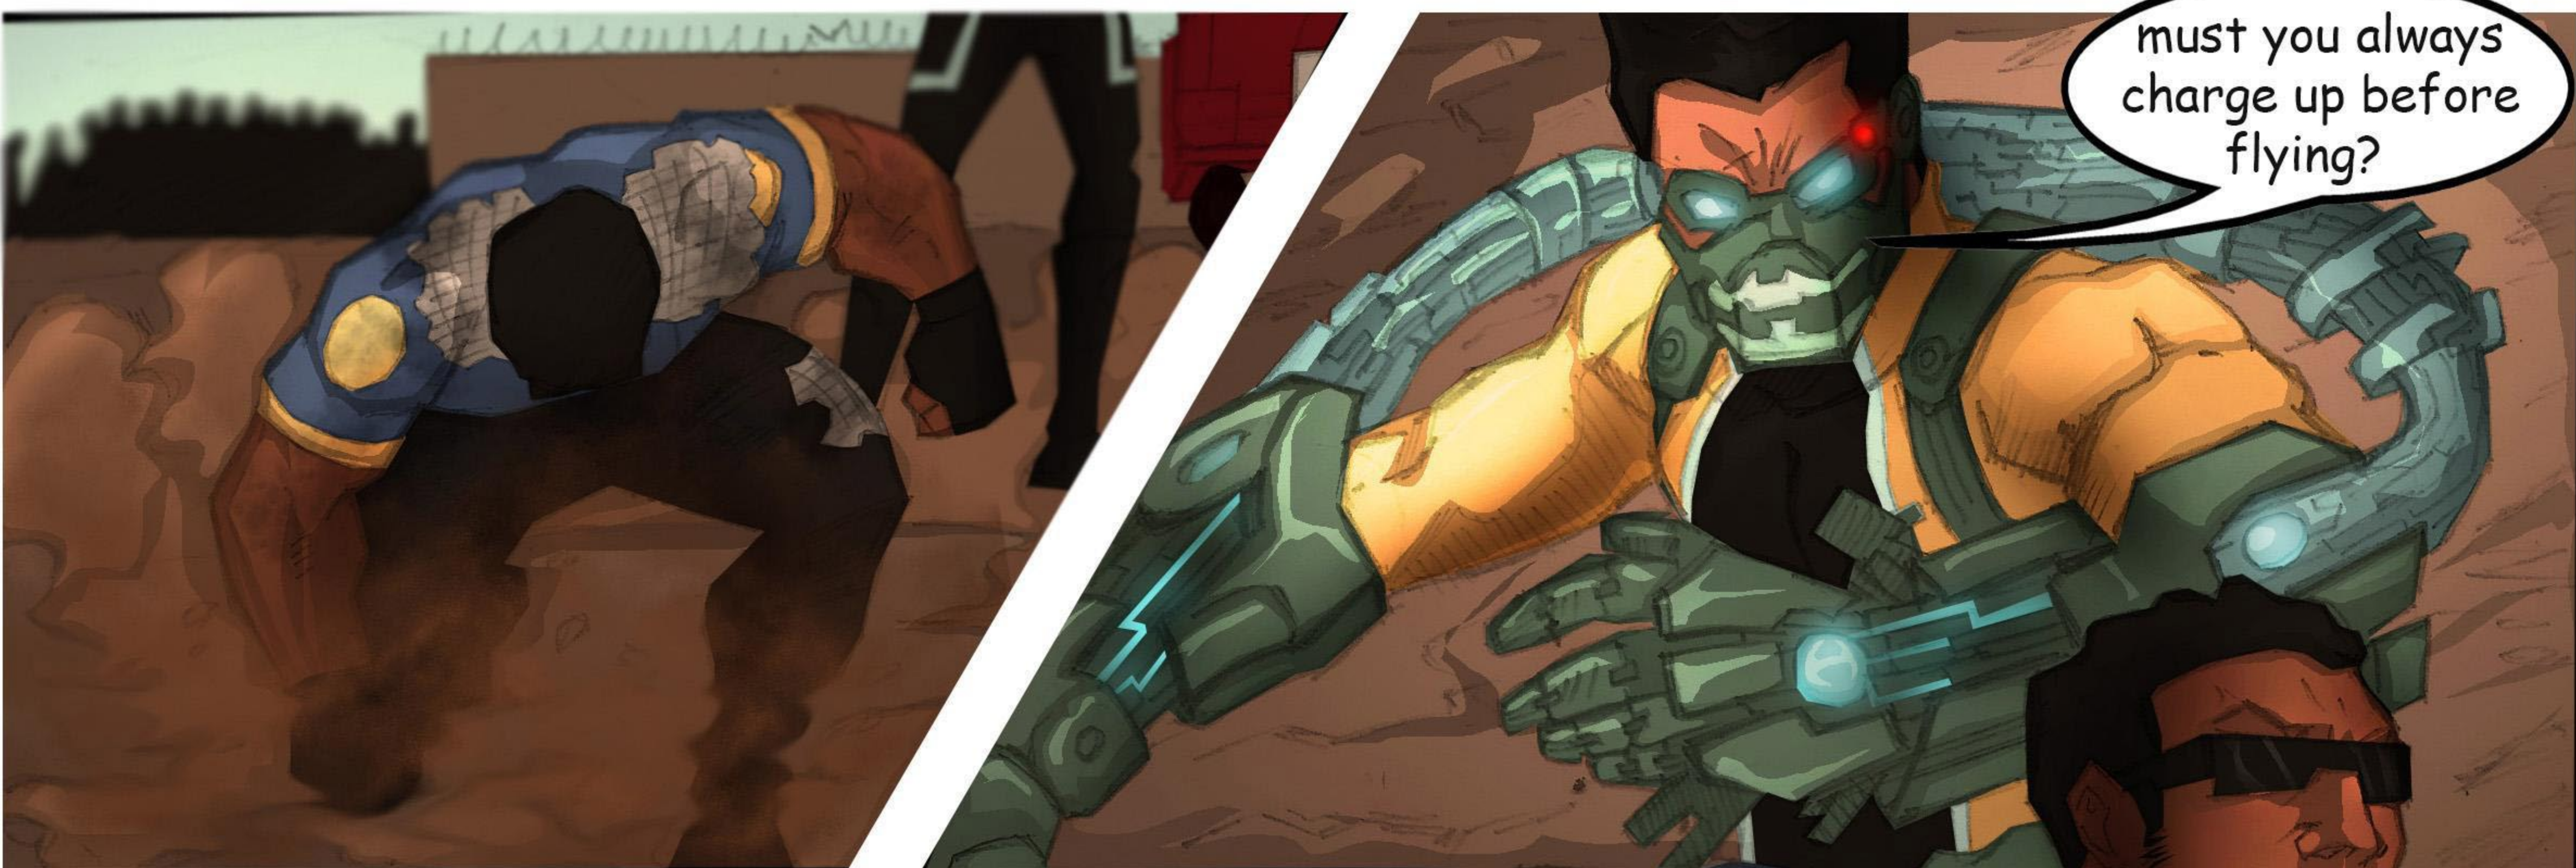

so we--

so we smash it!

erm.. that works too!

I'll get everyone out of the way!

must you always charge up before flying?

BOOM!

These guys, what they go through everyday, the trials they face---

---they should be called super heroes. Now that's their firebrand.

RRRAAAGGH!!

The light in the darkness.

FEAR

FEAR IN THE DARK

THERE IS TRULY
NO THING TO FEAR
BUT FEAR
ITSELF!

NEXTH MONTH, COMIC REPUBLIC ENTERS UNCHARTED WATERS, EXPLORING THE REALM OF FEAR WITH A NEW AND ECCENTRIC HERO WHO IS LITERALLY FEAR ITSELF!, WITH AMAZING ART OF UNDERGROUND ARTIST HZO EZEUGU AND COLORS BY "MAX!", COMING SOON TO COMIC REPUBLIC...

TOBE "MAX"
EZEUGU

HAVE NO FEAR!
EZEUGU

The average velocity of a meteor on entry is 10km/s -70km/s, these meteors are moving at 30km/s and burning up at a rate of 1,649°C. Powerboy's estimated time of impact is 63 seconds, I have 30 seconds to focus my magnetic ability and separate the metallic parts to fragments.

This is so going on instagram!

ughhh!!!

I got ya'!

cough!
cough!

Hmm
shirt number
25 ..burnt!

Shut up dude!

Smile
and wave
boys, just smile
and wave.

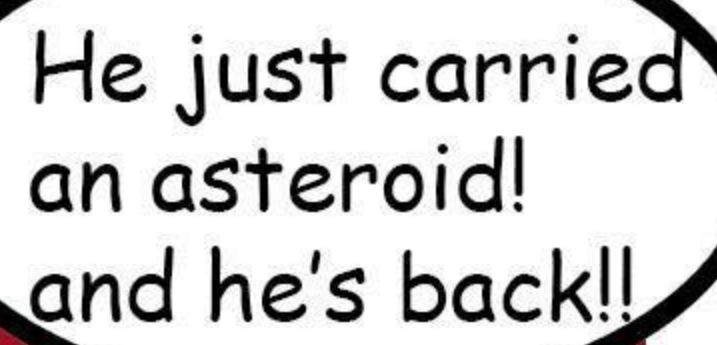

And one thing I keep thanking God
for; they're not the only ones
of their kind...

I hope no one is hurt,
my efforts...

WOW! It is...Its him
**GUARDIAN
PRIME!!!**

He just carried
an asteroid!
and he's back!!

Oh,
that's him...
It's---

Yeah I should...
like I should talk to
him instead right?
I should...

Hey,
don't look at
me I aint
going!

An asteroid!
Guy, you just nearly
got smashed by a
meteor rock!

That's awesome
he's awesome!

Ok... erm...
I'm Toye... no I'm
extr... Argh, why am I
so nervous, he's
just a guy in a suit!
Heck, am
Powerbox!

Hmmph,
you go, I don't
like him!

What happened here, is everyone alright? Officers how may I be of service?

Mr. Guardian prime, can we have statement concerning the asteroid that was reported to be heading our way, is it true you literally carried it away?

Its him, it's Guardian Prime! Mr. Guardian Prime?

Officer, please what happened?

Well, it was a burning building sir but all the---

Excuse me, mr. Guardian Prime, sir---

Burning building sir... Mr. Guardian Prime, but me and my team arrived in time to handle---

While I was still trying to bring myself together after they pulled me out of that building, these...these heroes had already stopped another disaster! For them; it was save this one, then on to next. For them it was being the heroes the country needed them to be!

Sorry, I don't think we've been acquainted?

Don't get me wrong, I help people, I risk my life to save lives. I know God sees my efforts...

He's Max Speed, I'm Powerbox and that guy's Nu-tech, we are--
THE EXTREMES!

We evacuated everyone and stopped the fire!

Extremes, right?

Good job, I never imagined what would have happened had you not intervened!

Thanks sir, we appreciate it!

But what these people do, its different. They dont just save lives, they touch it. Everyone they save is left with something; this feeling of hope. Is it faith, is it spirit?

Did you hear that?

I have to go, there is trouble in the city! We will meet again.

Did you see that? He took off without making a boom, you can't even do that!

Shut up dude!

Well dont just stand there with your mouths wide open...

The rest of the city still needs saving!

What I know is that with them around, no matter the trial, the people can get up and move on.

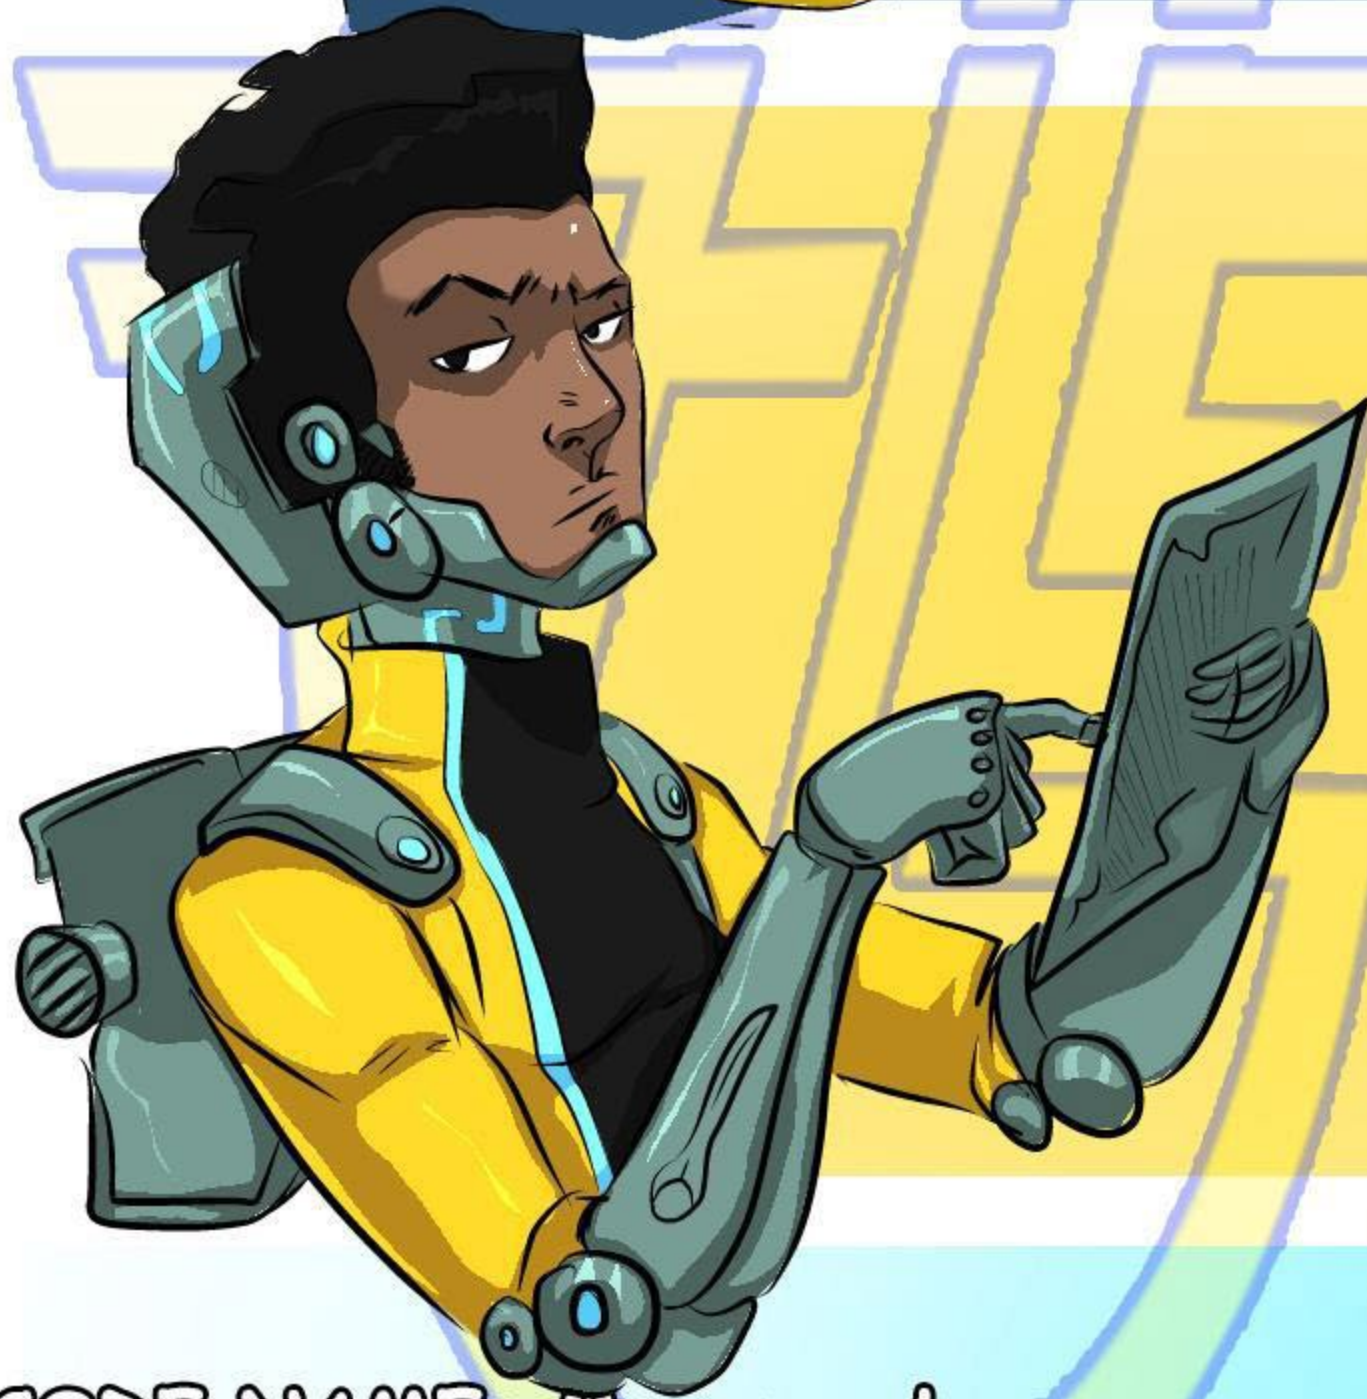

This truly is a HERO GENERATION.

CODE NAME: Powerbox
REAL NAME: Toye Oluwadare
AGE: 17

ABILITIES: super strength, invulnerability, adaptability, flight

ABOUT: likes soccer and he's the captain of his school soccer team, always social networking which makes him hardly pay attention to himself and his surrounding

CODE NAME: Nu-tech
REAL NAME: Joshua Hakeem Martins
AGE: 16

ABILITIES: teletechnopath, teletechnokinesis, magnetism and an advanced iq

ABOUT: likes comics and cartoons.

joshua is the schools smartest student and as a result has a nerdy attitude except in his alter ego; nu-tech tends to be more comical, and full of wit

CODE NAME: Maxspeed
REALNAME: Marcus Chigozie
AGE: 15

ABILITIES: super-speed, agility, martial arts and he can vibrate the molecules of objects to expolode

ABOUT: marcus doesn't get along well with others due to his anger management issues. He also comes from an extremely wealthy background

SUPER FACT

Do you think you know all you need to know about Asteroids? Well I doubt you know that much. Here's an asteroid 101 if you wanna know more. To begin, the word asteroid means "star-like" in Greek. Asteroids and planets are like relatives, in the fact that they share a common birth (sorta like bros), now lemme explain; planets are formed through a processes called accretion or you could just call it growth. Asteroids could actually become planets (how? let's just hope it doesn't come to that) most likely Asteroids may have broken away from planets.

Asteroids have class, no they don't go to school! An Asteroid can be grouped like this; C-class found in the earth's outer belt composed mostly of carbon. D-class a.k.a "Trojans" asteroids orbiting near Jupiter. (I want to go to Jupiter!) S-class found mostly in the earth's inner belt, V-class totally far out group made up of igneous rock and eruptivematerials (picture volcanoes, "BOOM"). Asteroids have "moons", in 1993 a spacecraft called Galileo proved that, (but no they do not have people).. Asteroids move with the pack, and rarely stray from their orbit path (direction), unless, well Guardian Prime comes in again!

N.E.A (near earth asteroids)-"these big guys" caused a stir a few years back, you may have heard of it (you didn't? don't be a geek). The next asteroid collision is in 20 years and then 8 years, after that, well the N.E.A's are monitored by N.A.S.A (and beside the Extremes are always here)! Get this, an S-class asteroid is composed 80% metal (boooorring!!), but those Asteroids have more metal than the entire summation of metals used by humanity from stone age to the present. Fact; If each person owned an asteroid it would equate in wealth to 100 billion dollars for each individual on earth. There're 6 billion people on earth and there are more than a billion asteroids (Makes me wonder, why I busted the thing I mean 'jeeez' that's a 100 billion dollars, a 100 billion, am supposed to be smart! (well I am :P, that's a super fact!)
